DETAILED ACTION

1. The amendment filed July 9, 2003 has been entered.

Claim Rejections - 35 USC § 102/103

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shecter, pn 2,906,070.

Shecter discloses an apparatus with every structural limitation of the claimed invention including an arranging device (e.g., 3), an oblique plate (e.g., 5), a supporting resilient plate (e.g., 30a), and a pair of retainer rollers (e.g., 26, 27), wherein the retainer rollers are concentrically disposed (e.g., each roller is concentrically disposed with respect to the support

Art Unit: 3724

upon which it is mounted and with respect to its axis of rotation), and wherein the rollers have a predetermined groove (e.g., the groove in which the belt 25 is mounted).

In the alternative, it is argued that a groove is not explicitly disclosed in Shecter, the Examiner takes Official notice that such grooves are old and well known in the art, particularly the conveyor art, and provide various well known benefits including maintaining a belt in a desired position on a roller to prevent the belt from inadvertently sliding off the roller. Therefore, it would have been obvious to one having ordinary skill in the art to provide the rollers of Shecter with a groove for the well known benefits including that described above.

Allowable Subject Matter

5. Claims 2, 7-9, 10, 11 and 13 are allowable over the prior art of record.

Response to Arguments

6. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3724

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
